

METHOD AND SYSTEM FOR AUTOMATICALLY CREATING VOICE XML FILE

ABSTRACT

This invention discloses a system for creating voice XML file
5 automatically, comprising: a graphic user interface for defining a plurality
of icons, wherein each of said icons corresponds to one or more attributes of
voice XML; voice XML tag generator for interpreting said action stream based
on a library of voice XML tags, generating the corresponding voice XML tags;
and, voice XML file generator for combining the contents to be played with the
10 tags generated by the voice XML tag generator according voice XML syntax, for
creating the voice XML file. This system can create the voice XML file for
the TTS voice XML file or the real-time-recorded audio voice XML file.
